

NexSun1800

Solar Powered Floodlight

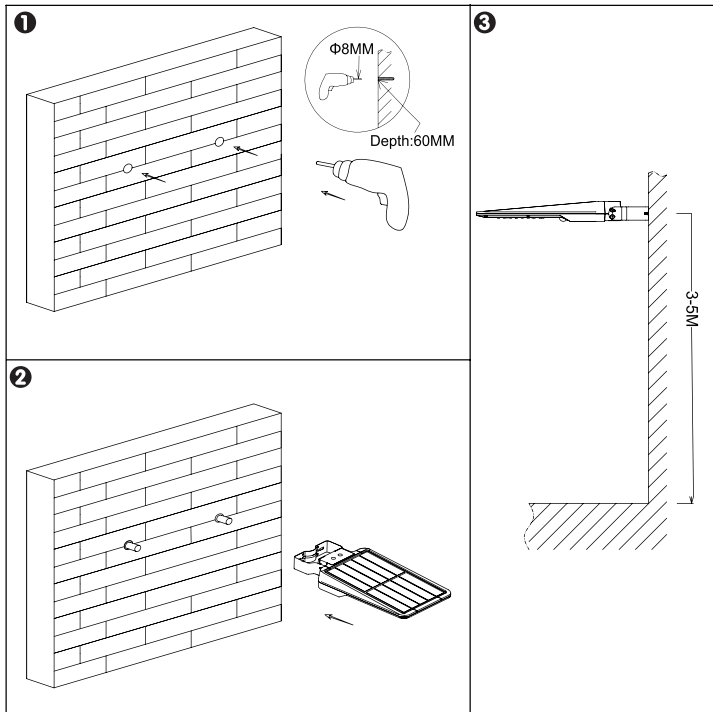

Supplied with:
 1 x Solar floodlight
 1 x Arch shaped bracket
 2 x U shaped brackets
 Hex key and screws

Find a sunny location to install the floodlight.

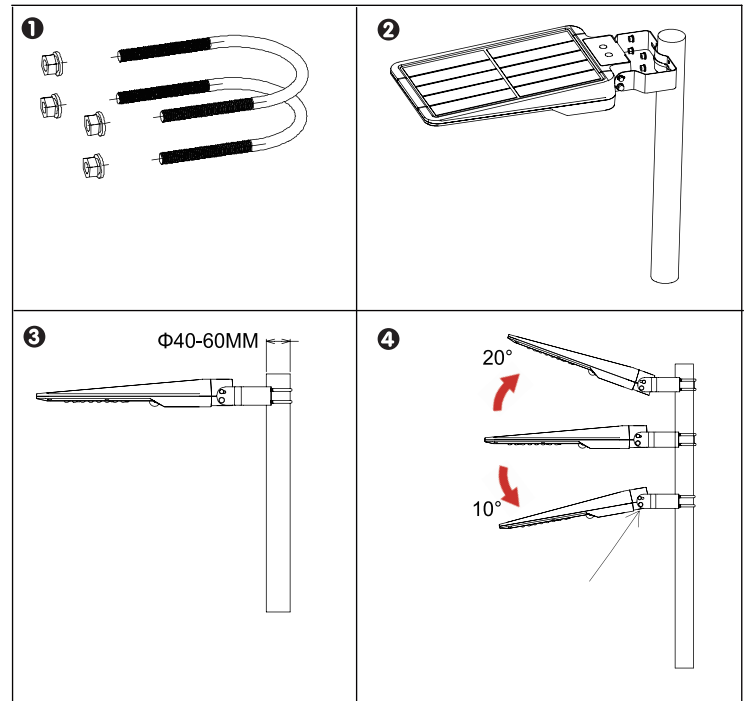

3 Different installation methods:

A. Wall Mounted:

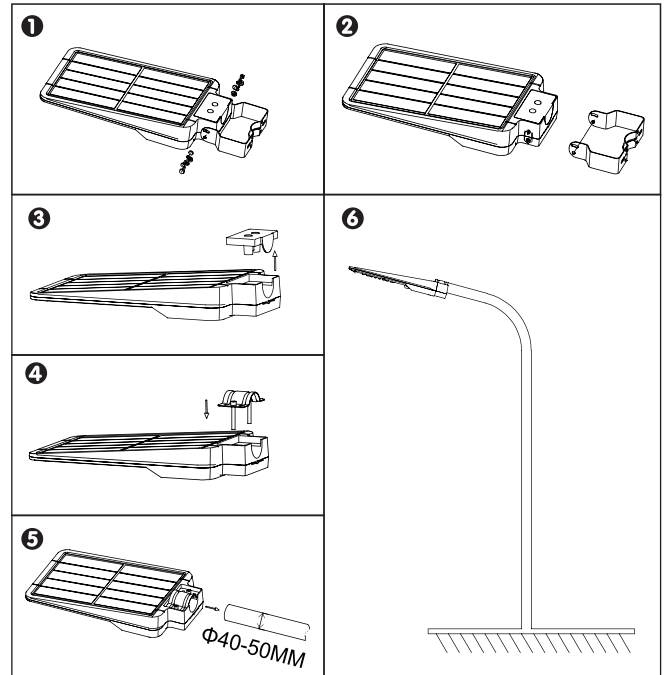

1. Drill two holes of $\Phi 8\text{MM}$ with a depth of 60MM on the wall.
2. Fix the expansion screws into the holes.
3. Then use a hex key to fix the lamp on the wall with expansion screws.

B. Straight pole:

1. Remove the nut spacer of U-shaped brackets.
2. Use the U-shaped brackets to fix the lamp on the pole.
3. The poles diameter should be $\Phi 40-60\text{MM}$.
4. Loosen the screws at both ends of the bracket and adjust the angle of the lamp as needed, which is 20° adjustable in clockwise direction and 10° adjustable in counter clockwise direction, then tighten the screws.

C. Curved pole:

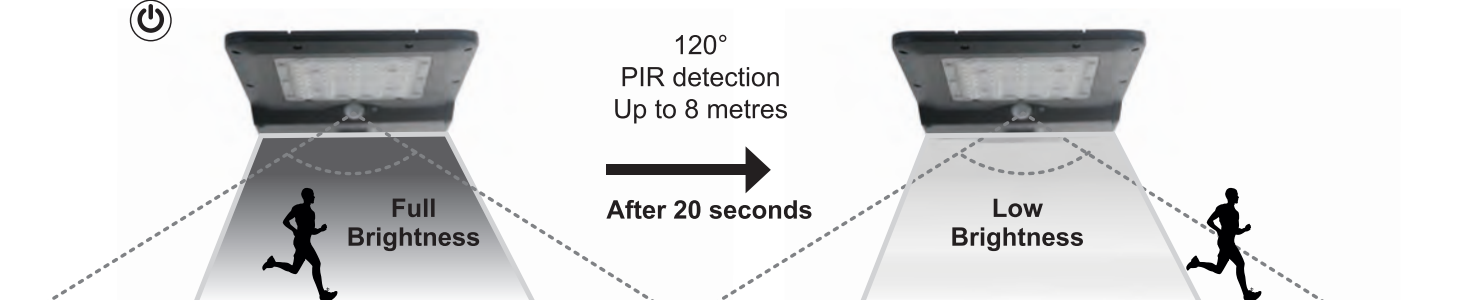

- 1+2. Loosen the screws and take off the bracket.
3. Move the cover of lamp socket.
4. Fix the arch-shaped bracket onto the lamp socket. (Do not lock first).
5. Set up the lamp onto the lamp pole. The poles diameter should be $\Phi 40-60\text{MM}$.
6. Adjust the lamp and balance it, then lock the arch-shaped bracket.

Operating the floodlight:

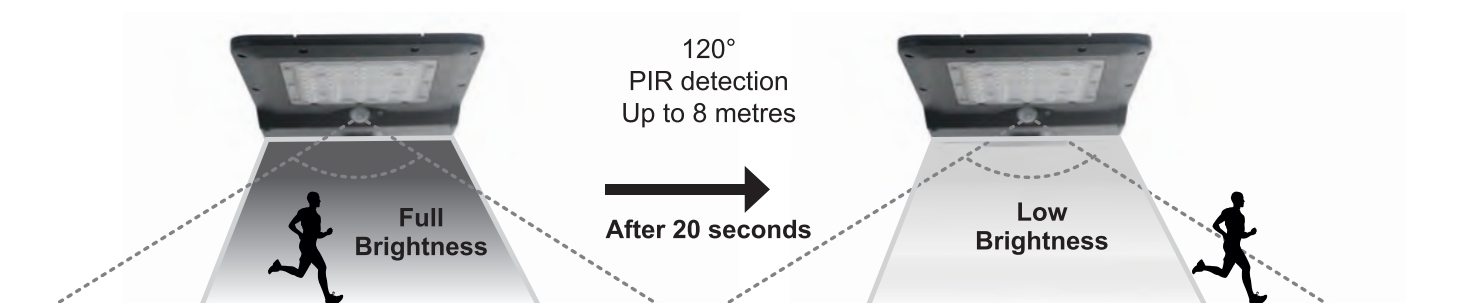

Press the ON/OFF (⏻) button on the floodlight.
The floodlight will automatically operate in power saving mode:

Power Saving Technology:

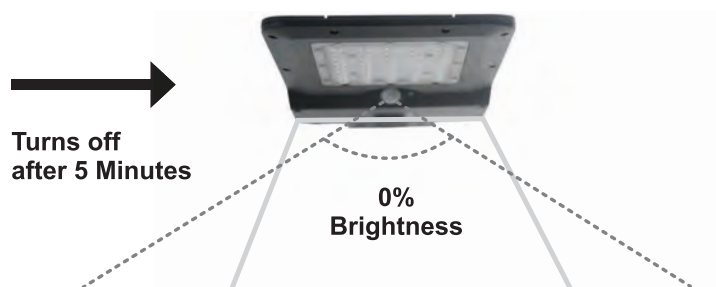

Automatically turns on full brightness when motion is detected up to 8 metres, the light will then turn to low brightness after 20 seconds.

After 5 hours or 30% battery capacity:

Automatically turns on full beam when motion is detected up to 8 metres, then light turns to low beam after 20 seconds and turns off after 5 minutes.
